

# Vessel & Port Situation Memo

Commercial Status Update – Waiting at Anchor

Reference: DEMO-MEMO-2026-0524

Synthetic Demo Document – Demonstration Purposes Only

## Vessel Status

MV Pacific Merit (IMO 9876543) arrived Newport News anchorage on May 19, 2026. Current status: at anchor awaiting berth allocation.

Vessel has now waited 5 days. Master reports fuel consumption and crew overtime increasing while cargo remains undischarged.

## Port / Terminal

Port congestion risk remains elevated. Charterers should confirm laytime start position and demurrage accrual with owners before accepting further waiting time.

- Port queue length: 8 vessels ahead for Dominion Terminal Associates
- Berth status: delayed due to weather and prior vessel demurrage dispute
- Terminal advises NOR acceptance may be deferred until berth window confirmed

## Commercial Flags

Sampling and quality confirmation still outstanding against loadport COA. Contract notes reference possible rejection language if CSR and ash remain off-spec at discharge.

Recommend CCA expert review before cargo release, payment, or further demurrage exposure accrual.

## Disclaimer

This synthetic document is provided for demonstration and workflow testing only. It does not represent a real vessel, charter party, laboratory result, or commercial transaction.
